

**City of Philadelphia**

**Division of Aviation**

**Carbon Emissions Reduction Statement**

The Philadelphia Division of Aviation strives to operate as a **world class global gateway**.

We will support the Philadelphia region **socially, economically, and environmentally** while maintaining and improving our existing Airport facilities.

We commit to reducing emissions and **minimizing our contribution to climate change**, to work towards the ambitious goal of carbon neutrality by 2050, as set by the City of Philadelphia.

We are undertaking the following efforts to reduce our carbon emissions:

- *Energy efficient upgrades of DOA-owned buildings and parking structures*
- *Requiring sustainable design and LEED and Envision certifications in construction and renovations of our facilities and infrastructure*
- *Generation of renewable energy including solar and geothermal projects*
  - *Electrification of the DOA vehicle fleet and that of our tenants*

We will emphasize **flexibility** and **resilience** in our infrastructure and activities to limit disruptions and delays, enhancing our **customers' experience**.

We will make sustainable decisions and **engage our employees** and **regional stakeholders** while building for the future.

**Keith Brune, A.A.E., IAP**  
Interim Chief Executive Officer  
Philadelphia Division of Aviation
