

SAFETY POLICY STATEMENT

Placing people first is a core value of the Philadelphia International Airport (PHL).

PHL commits to its employees and passengers to provide the safest possible work and travel environment. As part of that commitment, PHL is implementing a Safety Management System (SMS) that enables Airport employees and tenants to report safety issues that are proactively addressed and resolved in a collaborative manner. An integral part of the SMS is our reliance on each individual to participate in and improve safety practices as part of their daily work activities.

WE EXPECT:

- Safety to be the primary focus in all business activities
- Positive collaboration among all members of the airport community
- Reporting of safety concerns from all staff and tenants

WE COMMIT TO:

- Continuously striving to improve safety throughout the airport
- Practicing proactive safety management
- Ensuring compliance with all applicable regulations and standards
- Communicating safety trends and progress made as an airport community
