Apple Maps to Include Philadelphia International Airport

PHILADELPHIA – With iOS 11 available this fall, Apple Maps will add indoor maps for shopping centers and major airports around the world including Philadelphia International Airport (PHL).

The indoor maps feature will make it easier for users to locate more than 170 shops, restaurants and eateries, as well as airline gates, services and amenities within PHL and also offers indoor positioning so users can see where they are within the airport.

“We are very excited to have PHL included in Apple Maps,” said Airport CEO Chellie Cameron. “We understand it can be challenging to travel through an airport as large as ours, and Apple Maps will make it easier for our customers to locate and access our facilities and services.”

###

Philadelphia International Airport is owned and operated by the City of Philadelphia. The Airport is a self-sustaining entity that operates without the use of local tax dollars. It is one of the largest economic engines in Pennsylvania, generating \$15.4 billion in spending annually and supporting more than 96,300 full-time jobs for the 11-county Philadelphia MSA.
